MOTTO "AS I THINK SO SHALL I BECOME".

## 18th AUGUST 1994 AT THE

### Our Guest speaker . . .

If Neil Diamond could be coerced into sticking his hand into paint and then putting his signature onto the finished result, if the Govenner-General could be convinced that he should become the Patron of an hitherto unknown association called "Artists for Life", if other world famous people could be asked to join, then surely the person that did all this coercing had to be a person of a special kind.

SHARON DAVSON is just that person. An artist, a carer of the human race and its environs, a lover of animals and birds with a great worry about the potential extinction of certain species this is the person that Sharon exhibited last week at our meeting.

At the end of the meeting all were convinced that by their own application and motivation their ability to 'turn drips into waterfalls' could be a reality.

Sharon's dynamic ability as a speaker left little to be desired, her ability to ask for money and help was done in such a professional manner that some members immediately contributed to her cause (good on ya ROB ELRINGTON).

In closing your scribe can only add that he wishes that he knew that Sharon's coat turned out to be one of those expensive ones. Had he had known earlier maybe he might have been out the door and off into the Cross. Sharon that was some closing.
